

## Drywall Screws

### Yellow Zinc

Drywall screws are traditionally used to attach drywall to metal and wood, but also have many other external applications.

| Features                                  | Applications  | Installation Speed                | Drill Capacity    |
|---|---|-----------------------------------|-------------------|
| Bugle head<br>Fine thread<br>Needle point | For fixing to <ul style="list-style-type: none"> <li>light steel</li> <li>timber</li> <li>plasterboard</li> </ul> | 2300 -2500 RPM<br>max drill speed | <1.0mm thin steel |

| Finish             | Material     | Head                    |
|--------------------|--------------|-------------------------|
| Yellow Zinc Plated | Carbon Steel | Bugle<br>Phillips Drive |
